MODERN STEEL DOOR SYSTEMS

MAIDEN®

Be Bold - Be Modern

# MAIDEN®

## MODERN STEEL DOOR SYSTEMS

**MAIDEN** specializes in modern door systems built from High-Quality Steel by High-Quality Craftsmen. Our industry leading doors combine cutting-edge design with thoughtful engineering, precision fabrication and durable finishes. Our products are sure to make a bold statement, creating an unparalleled first impression for your home or business.

### ENTRY PIVOT DOORS

MAIDEN Steel Entry Pivot Doors stand alone in the industry due to their fully welded construction, proprietary pivot hinge hardware, multi-coat finishes and signature design options.

### WINE ROOM ENCLOSURES

MAIDEN Steel Wine Room Systems are specifically designed for climate controlled wine storage spaces. The welded construction, insulated dual pane glass, and architectural door seals allow for a modern and high performing enclosure.

### SLIDING DOOR SYSTEMS

MAIDEN Steel Sliding Doors combine low profile framework with glass panels, and are specifically designed for pocket door applications or exposed sliding track systems. Operable doors can be configured with various fixed panels to adapt to any condition.

### MODERN BARN DOOR HARDWARE

MAIDEN Steel Barn Door Hardware pairs contemporary style with classic design for those wanting a strong, bold and high performing alternative to traditional barn door hardware.

## WHY STEEL? WHY MAIDEN?

### FUNCTION

MAIDEN doors are heavy and rigid, yet function with ease, thanks to welded Steel construction and precision components. Integrated door hardware comes standard with pre-aligned hinges, spring loaded latches (roller catches), signature door pulls and various lock options. Our seamless framework also incorporates a weather strip and door sweep system to create highly functional seals.

### STRENGTH

MAIDEN Steel doors are constructed using raw, structural materials that are fully welded and polished to create a strong and seamless appearance. The strength of Steel allows for bigger, better, and more secure doors.

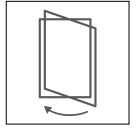

### AESTHETIC

MAIDEN products combine seamless construction, minimal material profiles, modern designs and artistic powder coat finishes to create a truly premium product.

### QUALITY

Rather than being assembled on-site, MAIDEN products are manufactured in a controlled facility to ensure high precision and quality. Products are pre-assembled to allow for easy installation into prepared rough openings.

# Pivot

## By MAIDEN

Maiden Steel's pivot series is offered in six contemporary models. Each door is a pre-assembled unit, designed for ease of installation into each specific opening. With a focus on steel construction, our doors feature fully welded and polished seams, custom sealed ball bearing pivot hinge hardware, dual thermoplastic rubber compression door stops & flush mounted roller catches.

The Signature Style is designed with bold details, engineered for oversized door capabilities & incorporates MAIDEN recessed handles. In comparison, the Low Profile (LP) Style is designed with minimal sight lines, maximum glass exposure & incorporates full height door pulls. Our doors feature a Marine grade powder coat finish, making our doors highly durable in any climate.

# Wine

## By MAIDEN

The MAIDEN Wine Room Door Systems are designed to offer customizable size, materials, and finish options. Our three standard models can be combined with various panel, side lite, transom and corner components to create a truly custom system configuration.

Specifically designed for climate controlled spaces, all systems feature dual pane (Low E) insulated glass, custom Steel glass stops, architectural foam glazing, spring loaded roller catches, rubber weather stripping and door sweeps to ensure air-tight seals.

### What's Included

• 3 low profile models	• Insulated dual-pane ( Low E) glass
• Customizable configurations	• Spring loaded roller catches
• Pre-assembled unit	• Signature full height door pulls (1-1/4" Dia.)
• Designed for easy installation into rough openings	• Baldwin® 8241 contemporary deadbolt
• Welded Steel construction	• Low profile locks available
• Fully welded and polished seams	• Rubber weather stripping & door sweeps
• Artistic powder coat finish options	• Architectural foam glazing

### Glass Options

#### Dual Pane (Low-E)

• Clear IGU (Tempered)
• Acid Etched IGU (Tempered)
• Custom \$

Signature

The ONE

The ONE Wine Room Door is the most minimal design in the collection. With narrow framework and large glass panel sizes, this model is complimentary to any decor style and elegantly exhibits the wine collection that it assists in storing.

Specifically designed for thermally controlled spaces, all systems feature dual pane (Low E) insulated glass, custom steel glass stops, architectural foam glazing, spring loaded roller catches, and rubber weather stripping to ensure air-tight seals.

## The TWO

The TWO Wine Room Door features one horizontal partition. The location of the horizontal member is customizable to match existing design elements in a space. Additionally, a lower or upper infill section allows for the option to incorporate frosted glass or decorative metal panels.

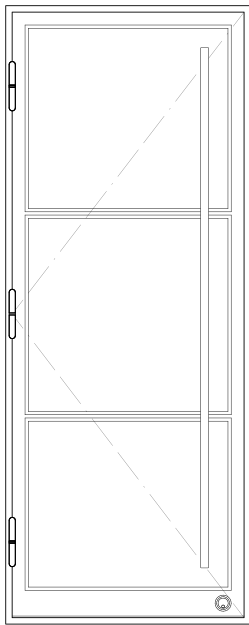

Specifically designed for thermally controlled spaces, all systems feature dual pane (Low E) insulated glass, custom steel glass stops, architectural foam glazing, spring loaded roller catches, and rubber weather stripping to ensure air-tight seals.

PC1

PC1

Signature

The THREE

The THREE Wine Room Door is our most segmented and classic design. When paired with side lites, transom and panel sections, the muntin pattern forms minimal sight lines that create a space of its own.

Specifically designed for thermally controlled spaces, all systems feature dual pane (Low E) insulated glass, custom steel glass stops, architectural foam glazing, spring loaded roller catches, and rubber weather stripping to ensure air-tight seals.

# Sliding

## By MAIDEN

The MAIDEN Exposed Sliding Track System pairs a welded steel track with a modern steel & glass door panel. With narrow framework and large glass panel sizes, this system transforms any opening into an architectural focal point.

The MAIDEN Pocket Door System features low profile (LP) steel and glass doors that are designed to be a modern alternative to traditional pocket doors. The system utilizes a hidden sliding track system and is intended to recess into a prepared pocket opening.

### Low Profile Steel & Glass Door Panels & Hardware Features
